ONLINE INSTRUCTOR
Professional Specialization Certificate in Population Health Data Analysis

The Division of Continuing Studies at the University of Victoria invites applications for an Instructor in our Population Health Data Analysis program. This program is offered exclusively online.

Currently, we are seeking an Instructor for PHDA02, *Epidemiological Statistics*, to be offered in May 2018 in a fully online format. This position requires extensive working knowledge of research using administrative data and proficient use of SAS for data management and construction of analytic data sets. The successful candidate will be familiar with research (or related) analysis methods. We are especially interested in candidates who can demonstrate the development of creative analytic concepts (e.g. continuity of care) from complex, raw data and a strong commitment to excellence in teaching.

The ideal candidate will have a PhD in the field of epidemiology or population and public health with strong methodological expertise and related research experience in applied epidemiological studies. Proficiency in SAS programming and use of administrative health data will be considered an asset.

**Requirements**

Applicants must be located within Canada to deliver this course and must have:
- a masters Degree in health services research, epidemiology or a quantitative social science discipline
- research experience in the fields of population health, health services research, epidemiology or a related area. Must have skills in developing research questions and conducting research, ideally with some background in the creative use of administrative data and survey data
- technical knowledge and experience with large administrative data sets. Must have data management expertise using SAS
- teaching experience; experience in distance education considered an asset

**Preferred Requirements:**
- a PhD in the field of health services research, epidemiology or a quantitative social science discipline and related research experience using administrative data
- an advanced understanding of study design and use
- knowledge of additional software packages including R, SPSS

Please submit a résumé with a letter of intent and references by Wednesday, February 2, 2018 to:
Maxine Reitsma, Program Coordinator
