Let new perspectives take flight...

21ST ANNUAL
Current Concepts in Dentistry

Nov. 9-12, 2019
Earn up to 28 dental continuing education credits
Welcome to the 21st Annual Current Concepts in Dentistry

Dear Dental Professional,

Hosted on the beautiful grounds at the University of Victoria, this annual continuing professional dental event has grown into a favourite learning opportunity for dental professionals from across Canada and beyond.

This event will feature innovative lecturers who are outstanding leaders in their field, sharing their expertise on current issues and best practices, advancing your learning in a friendly and collegial setting.

I invite you to attend one day, selected days, or all four days, network with colleagues and even extend your stay while the University of Victoria treats you to the best of continuing dental education.

I look forward to seeing you in Victoria!

Laura Vizina, BSc, MEd, CEC, Program Director
Health Sciences and Public Relations Programs
Division of Continuing Studies
University of Victoria

Nov. 9–12, 2019

SPECIAL THANKS
Dr. A. K. Bhardwaj, BDS, DDS, FRCD(C)
Current Concepts in Dentistry Founder
Dr. Bhardwaj is an Oral and Maxillofacial Surgeon, and is Academic Chair of the Current Concepts in Dentistry Advisory Committee. His responsibilities include identification of topics and instructors.

Special acknowledgement to our Academic Advisory Committee:

Colin F. Foster, BDS, MSc, FRCD(c)
Sandy Hunter, BSc, DMD
Robyn Jamieson, CDA
Tony Rea, BSc, DMD, FRCD(c)
Meredith Walker, RDH
Kerr Williamson, BSc, DDS

21 years of academic excellence
Why should you attend?

• Learn from instructors who are experts in their fields
• Gain practical dental education you can apply to your practice
• Network with colleagues from across Canada and the US
• Fulfill your dental CE requirements: earn up to 28 CE credits
• Enjoy the city of gardens, beautiful Victoria

What will you learn?

This year’s sessions will allow you to stay current in your profession by providing you with continuing dental education on the following topics:

• Restorative Update 2019: Materials & Clinical Techniques
• Endodontic Failures: How to Avoid, How to Diagnose and How to Treat
• Managing the Medically Compromised Patient or How to Prevent Medical Emergencies
• Anxiety Control in Dental Practice – The Art of Oral and Inhalational Adult Minimal Sedation

What else will you take away?

Seven hours of continuing education credits will be awarded per day of attendance. Dentists and allied personnel may attend one day, selected days or all four days for a maximum of 28 continuing education credits.

Where is the program held?

The sessions take place at the beautiful campus of the University of Victoria, which is about six kilometres from downtown Victoria with frequent, accessible bus service available. Those driving to campus may purchase parking permits at kiosks located in each campus parking lot. Classroom locations and a campus map are indicated on your registration receipt.
University of Victoria
uvic.ca

UVic is rated one of the top universities in Canada, welcoming over 21,000 students each year. The park-like campus is comfortable, lively and located just five minutes from the beach and 20 minutes from downtown Victoria.

City of Victoria
tourismvictoria.com

Boasting one of the mildest climates in Canada, Victoria is a year-round destination that offers a friendly, safe haven for all visitors. The wild beauty of the Pacific coast and adventures in the great outdoors are within city limits and ocean and mountain vistas will follow you wherever you go.
Daily schedule

Nov. 9–12, 2019

8–8:30 am  Registration and refreshments
8:30 am–noon  Presentation (with mid-morning break)
Noon–12:30 pm  Lunch (provided)
12:30–4 pm  Presentation (with mid-afternoon break)

CPR-C Recertification*

Offered on site, 4 to 6 pm
Saturday, Nov. 9

This course covers prevention, recognition and treatment of heart attack, angina and stroke. It will also review emergency scene management, recognition and treatment for conscious and unconscious choking emergencies, adult, child and infant CPR as well as the use of an Automated External Defibrillator. This is a hands-on course with no written examination. The Canadian Red Cross certification is valid for three years.

Fee: $75 per person  |  Code: HPPD270

CPR Refund Policy: Course withdrawal must occur by Oct. 18, 2019 for a refund minus a $35 administration fee. There will be no refund for withdrawal after Oct. 18, 2019.

*NOTE: This course is only offered to dental professionals attending this year’s Current Concepts in Dentistry program.

Don’t miss our Early Bird savings!

See registration details on page 10
How does a conscientious restorative dentist provide the best care with predictability and longevity? This course will provide a comprehensive overview of innovations and essential techniques for success in restorative dentistry. The use of clinical evidence from well-performed prospective clinical trials combined with significant experience gleaned from numerous study club, faculty and student cases provide the foundation for the recommendations and observations presented. Topics will include: surgical management of carious lesions, composite adhesive, filling and polishing techniques, the indications for zirconia (bilayed and monolithic) and glass–ceramic materials, cast gold and its use in a modern dental practice, and key occlusal considerations with all dental materials.

Learning objectives

- Manage the deep carious lesion
- Understand strategies to improve the performance of composite restorations
- Where, when and how to use indirect tooth-colored crown and veneer materials
- Review conservative and esthetic techniques for cast gold
- Understand the methods to properly perform occlusal adjustments, polishing and fracture mitigation

Instructor: Richard G. Stevenson III, DDS, FAGD, FACP, ABOD, is Professor of Clinical Dentistry, Emeritus, Division of Constitutive and Regenerative Sciences, Section of Restorative Dentistry at University of California, Los Angeles (UCLA). Prior to his current appointment at UCLA, Dr. Stevenson was a Clinical Professor, Division of Restorative Dentistry where he chaired the Operative course. Dr. Stevenson has taught nationally and internationally and received numerous teaching awards. He has published over 30 articles and abstracts on dental materials, the principles of Evidence-Based Dentistry, and restorative techniques in peer-reviewed Journals, including Operative Dentistry and The Journal of Esthetic and Restorative Dentistry. Dr. Stevenson maintains a private practice in West Los Angeles, USA. He is the Founder of Stevenson Dental Solutions, and Co-Founder of Master Milling Center, a dental education center and laboratory, dedicated to excellence in dentistry.

This course will differentiate endodontic failure from failure of endodontically treated teeth. It is important to understand what is success and failure of these two entities. We will examine how failures occur, and how to diagnose and manage them. Discussion topics will include: knowing the causes of failures, ways to avoid endodontic failures, and failure of endo treated teeth. Assessment of treatment outcomes is critical in determining their success or failure. This course will discuss clinical examination and radiographic assessment of endodontically treated teeth, including the role of CBCT. Once an endodontic failure has been diagnosed, we will discuss the various options for treatment. Knowing how to avoid endodontic failures, and how to diagnose and manage them, will equip the practitioner in providing their patients with good treatment.

Learning objectives

• Describe the difference between endodontic failure and failure of endodontically treated teeth
• Discuss the common causes of endodontic failure, and how to avoid them
• Differentiate the main causes of failure of endodontically treated teeth
• Describe the indications for the use of CBCT in endodontics
• Diagnose different types of endodontic failures
• Describe the different treatment options for endodontic failures

Instructor: Jeffrey Coil, DMD, MSD, PhD, FRCD(C), FADI, FACD, is the Director of the Graduate Endodontics Program, Department of Oral Biological and Medical Sciences, University of British Columbia. He serves as an editorial consultant for the Journal of the Canadian Dental Association and on the Scientific Advisory Board for the Journal of Endodontics. Dr. Coil is also the mentor of the Northwest Endodontic Study Club and Seminar. Dr. Coil received his undergraduate, dental and doctorate degrees from the University of British Columbia, and obtained his certificate in Endodontics at the University of Washington in 1993.

Managing the Medically Compromised Patient
or How to Prevent Medical Emergencies

Monday, Nov. 11: 8:30 am – 4 pm | Code: HPDS005-3 2019F C01

It is strongly recommended that all members of the dental office staff attend this course.

Life-threatening situations, though rare, can and do develop in the practice of dentistry. Though training in the recognition and management of emergency situations is mandatory, the prevention of such episodes is eminently more satisfying. It is therefore essential for all dental office personnel to be prepared to determine which dental patients represent an increased risk during treatment as well as being “potential catastrophes looking for a place to happen”. Our subject for discussion will be the prevention of life-threatening emergencies. An effective Physical Evaluation System will be discussed, including: medical history questionnaire, physical examination including vital signs, and dialogue history. A risk assessment system and treatment modifications will be presented. Recommendations for the safe and effective dental management of patients with many disorders, such as cardiovascular, respiratory, endocrine and neurologic will be presented.

Learning objectives

• Define the steps involved in evaluation of potential patients for treatment
• List and define each of the six categories of the A.S.A. physical status classification system
• Describe treatment modifications for each of these six groups (A.S.A.)
• Discuss techniques involved in the evaluation and dental management of patients with:
  » cardiovascular disorders
  » neurological disorders
  » respiratory disorders

Instructor: Stanley F. Malamed, DDS, a dentist anesthesiologist, is emeritus professor of dentistry at the Herman Ostrow School of Dentistry of U.S.C. (formerly the University of Southern California School of Dentistry), in Los Angeles, California. He is a Diplomate of the American Dental Board of Anesthesiology, a recipient of the Heidebrink award (1996) from the American Dental Society of Anesthesiology and the Horace Wells Award from the International Federation of Dental Anesthesia Societies (1997). Dr. Malamed has authored more than 150 scientific papers and 17 chapters in various medical and dental journals and textbooks in the areas of physical evaluation, emergency medicine, local anesthesia, sedation and general anesthesia.

Full bio available online: continuingstudies.uvic.ca/28DentalCEcredits
Providing dental care to anxious and fearful patients continues to be a major challenge facing dentists. Despite advances in management techniques and treatment delivery, patients’ pre-existing opinions and experiences contribute to dental anxiety and fear. Feelings of apprehension create psychological obstacles that prevent dental patients from seeking and receiving care. Of the current techniques to facilitate coping or to minimize procedure apprehension, in-office enteral sedation or oral conscious sedation has garnered the most attention. In recent years, the use of oral benzodiazepines such as triazolam and lorazepam (with or without nitrous oxide) for the diminution of perioperative anxiety and fear in dental patients has increased. Provincial and State dental boards, in response, have changed or developed new regulations outlining the training and equipment needed for in-office minimal, moderate and deep sedation. This dynamic course will cover both the science and art of oral and inhalational adult minimal sedation in an interactive and engaging multimedia presentation. The pharmacological basis of therapeutics will be addressed, taking the principles of academia into the realm of clinical practice. Treatment strategies and protocols will be discussed in a comprehensive, case-based approach. Most importantly, attendees will return to work with knowledge and techniques they can implement at chairside on Monday morning.

Learning objectives

• Discuss the principles of pharmacokinetics and pharmacodynamics
• Describe the continuum of consciousness
• List the characteristics of the ideal sedative for in-office use
• Discuss the advantages and disadvantages of oral conscious sedation versus other modalities
• Describe the mechanism of action and pharmacological properties of the benzodiazepine family of medications
• Match the right drug at the right dose to the right patient and the right procedure
• Understand the tremendous safety and utility of nitrous oxide
• Describe what is in your emergency kit, and why

Instructor: Mark Donaldson, BSP, RPH, ACRP, PHARM, FASHP, FACHE, is a Clinical Professor in the Department of Pharmacy at the University of Montana in Missoula, Clinical Associate Professor in the School of Dentistry at the Oregon Health & Sciences University in Portland, Oregon and Adjunct Professor, in the Faculty of Dentistry at the University of British Columbia. He has practiced as a clinical pharmacy specialist, clinical coordinator and director of pharmacy services at many healthcare organizations in both Canada and the United States. How to register:
1. [continuingstudies.uvic.ca/28DentalCEcredits](https://continuingstudies.uvic.ca/28DentalCEcredits)
2. 250-472-4747

PLEASE NOTE: Walk-in registrations from Nov. 9 will be subject to an additional 10% on Regular Rate.

The Division of Continuing Studies reserves the right to cancel/reschedule courses or other offerings without notice and to establish special regulations for admission to non-degree programs or courses. If a course or offering is cancelled/rescheduled, the liability of the Division of Continuing Studies is limited to a refund of the course fee or, if desired, transfer to another offering. The relevant law for all matters concerning this program shall be the law of the Province of British Columbia, Canada.

If you must withdraw due to unforeseen circumstances, please phone 250-472-4747 at least five working days prior to commencement of the course to receive a refund. Dentists will be charged a $75 administration fee per day of withdrawal, and allied personnel will be charged a $40 administration fee per day of withdrawal.

The University of Victoria collects personal information on its registration form pursuant to the *University Act*, RSBC 1996, c.468 and section 26 of the *Freedom of Information and Protection of Privacy Act*. The information you provide is used for the purposes of admission, registration and other decisions relating to your Continuing Studies program. For details on how the information is used, contact Continuing Studies or read UVic Policy 4400, Access to Student Records at: uvic.ca/registrar.
